### **DETAILED ACTION**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Applicant's submission filed on November 29, 2006 has been entered.

#### ***Preliminary Amendment***

Applicants' RCE request includes a request to enter the previous 116 amendment faxed on October 17, 2006.

Therefore claim 1 as amended by the amendment and claims 4 to 9 as previously recited are currently pending in the Application.

Claims 2-3 and 10-19 were previously cancelled.

#### **Information Disclosure Statement**

To date no IDS has been filed in the case.

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Art Unit: 2814

Claim 1 ( Twice Amended) : A mechanism for compressing chips, comprising:

a loading component;

a head component disposed under the loading component, wherein the head component has a heating plate therein, and a gap is existed between the loading component and the head component, and wherein the head component has a groove and the bottom of the loading component is partially inset into the groove, the head component comprising a first gasket having a contact part with the gimbal a .ring piece fixed an the first gasket, wherein the ring piece has a hollow portion such that the groove is (existed) between the ring piece and the first gasket; and a gimbal disposed between the loading component and the head component to support the gap there between.

In claim 1 The Examiner 's amendment only deletes the word " existed" so that the claim will be in better grammatical format and does not change the scope of claim.

***Allowable Subject Matter***

Claims 1 and 4-9 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitation of the dependent claims, in such manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The applied prior art fails to teach a combination of all the claimed steps/ elements, features as presented in independent claim 1 which describe a mechanism for compressing chips including the recited head component having a groove wherein the bottom of the loading element is partially inset. The head

component comprising a first gasket having a contact part with the gimbal , a ring piece fixed on the first gasket having a hollow portion such that the groove is between the ring piece and the first gasket.
